MOBILE DENTISTRY

NSK

Advanced Dental Care for Everybody.

We all know that tooth decay is treatable. But even in today's world, there are still regions without access to dental care. In areas where dentists are available it is not always easy to visit them in the clinic-especially for the elderly and less mobile. NSK has designed a portable treatment unit that has the functionality of a fully equipped treatment unit to help deliver advanced dental care regardless of the patients' location. Through various innovative ideas NSK's mobile dentistry is leading the way in providing mobile dental care.

Dentalone

Mobile Dental Cart

Helping You Care. Anywhere.*

Dentalone is the dentist's office mobile cart which is provided for restorative or preventive dentistry in the field such as Humanitarian, Home Care, Schools, and Army & Hospitals.

Advantages

- Compact
- Simple to use
- Mobile
- Plug and Play system
- Easy to carry
- User-friendly
- Extends up from case to cart
- Large range of functionality

Features

- All components pack into a case with an extendable carrying handle
- Up and down function of control unit and instrument carrier which is barrier fully for treatment position
- Small, light, complete unit
- Instrument carrier with automatic selection of instruments and easy positioning
- Integrated compressor for irrigation & 3-in-1 syringe
- Universal voltage adaptability (100 V-230 V)

*electricity supply required

NLX nano

Clinical Electric Micromotor
Smaller and lighter micromotor currently available.

Varios2 Lux

Multi Function Ultrasonic Scalers
iPiezo engine ensures stable power output and performance.

Multi Pad

Multi-Control pad for built-in system
Visual identification on the display is possible even during operation of the handpiece.

- Illuminated LCD control pad (Multi Pad)
- 40,000 min⁻¹ autoclavable brushless NLX nano micromotor with LED light, internal water and titanium body
- Integrated multi function ultrasonic scaler Varios 170 with LED light, slim and lightweight VA2-LUX-HP handpiece
- 3-in 1 air/water/spray syringe with LED light
- Saliva complete suction
- 500 ml water tank
- 1 litre waste container

Dentalone Complete Set

MODEL	ORDER CODE
Dentalone	S9070

- Contents**
- 1 Carrying Case
 - 1 Water tank for spray
 - 1 Tank for vacuum
 - Built in compressor
 - Built in suction pump
 - 1 Variable Foot Control
 - 1 Extendable Tablet

- Specifications**
[Dimensions]
- Case with trolley (unpulled trolley handle) : W 351 x D 405 x H 545 mm
 - Case with trolley (pulled trolley handle) : W 351 x D 405 x H 1,075 mm
 - Without case : W 350 x D 405 x H 496 mm
 - Working height : 766 mm
 - Weight with case : 18.5 kg
 - Power Supply : AC 100-230 V 50/60 Hz

VIVA ace Mobile Dentistry System

Wherever Possible

For more comfortable & more advanced home visits for dental treatment

As societies age more rapidly, there is an ever greater need for mobile dental treatment. Today's ageing population keeps more of their natural teeth, which means a wider range of treatments is required nearer to the patient. VIVA ace combines the functionality of a dental treatment centre in a compact body with multipurpose micromotor, ultrasonic scaler and more. Its lightweight build means it is easy to carry and straight forward to set up in different locations. The first of its kind with high-functionality, supports more comfortable dental treatment wherever the patient.

Lightweight and Compact

High Functionality, Just Like a Treatment Centre

Easy to Set-up and Breakdown

Lightweight and Compact

Highly manoeuvrable and lightweight, weighing only 8.6 kg. Its compact size is ideal for stowing in a car, is easily carried up and down stairs and fits into compact spaces. Simple to transport from one patient to another. The small size has been achieved by making each component lightweight and compact without compromising functionality.

All-in-one Package

A micromotor, ultrasonic scaler, 3 in 1 syringe and suction combined in a single compact body including storage space for all instruments.

Lightweight at 8.6 kg,* it can be Taken Anywhere.

Advanced Functionality in a Compact Body

Foot controls

Photos are of optional extras.

Highly Functional Portable Dental System Just Like a Treatment Centre

Excellent efficiency and safety are achieved via both the intuitive and highly visible large LCD control panel and the superb functionality provided by each individual instrument. A high functionality system, just like a treatment centre.

High Functionality Micromotor Full endodontic functionality

NLX plus

Ideally suited for all state of the art dental requirements

	Rotation speed (min ⁻¹)	Torque (Ncm)
General mode	1,000-40,000	4.0
Endodontic mode	100-5,000	0.3-3.0

Multipurpose Ultrasonic Scaler Comprehensive tip range

Varios2 Lux

NSK iPiezo ultrasonic engine

Provides the appropriate power at the tip end adapting to tooth conditions for firm or soft tartar. Safe scaling is possible even when removing hard tartar.

3 in 1 syringe

Lightweight and simple 3 in 1 syringe operation. The syringe nozzle uses a simple quick release mechanism.

Suction

Built in ball leaver valve to adjust suction power.

Foot controls

For treatments performed by just one practitioner

The micromotor, ultrasonic scaler and suction can be switched ON/OFF using one foot control in Sync mode.

Micromotor, Scaler & Suction

Micromotor, Scaler

Suction

For treatment performed by 2 operators, 1 dentist/hygienist and 1 dental nurse

Switch micromotor, ultrasonic scaler and suction ON/OFF using two foot controls. The two in combination lets the dentist concentrate on operating the micromotor and scaler.

Light Probe (optional)

Bright illumination of the oral cavity in any treatment environment. Good accessibility with a slim body that also makes it possible to access hard-to-see areas.

isoE-LUX

Quick Set up and Storage

Set up and storage is straight forward, simple and quick, making work more efficient and easier. The instrument holders and arm can be set at 4 different levels.

Hygienic as the components that touch the floor are kept in a separate storage compartment with a cover.

Storage is simple

Remove the handpieces for easy storage.

Very easy to maintain

4-level adjustable height and angle

Adjustable to various positions whether standing or sitting.

VIVAMATE G5

Portable Micromotor Unit

Portable LED Micromotor; from Denture Adjustment to General Applications

The latest member of pioneering VIVAMATE portable micromotor series, VIVAMATE G5 provides various functions to meet mobile dental needs. The newly developed control unit with innovative design offers portability and operability by being both mains and battery powered.

Control Panel Offers Simple and Intuitive Operation

Easy to see necessary information, such as rotation speed setting, power on/off and battery remaining levels. The control panel that allows intuitive operation greatly reduces stress to operate the instrument.

LED Micromotor

The compact size micromotor has been specifically developed for mobile dentistry and weighs only 148g (w/cord) and features an LED light. Although fully portable it performs like an in-surgery system meeting a wide range of clinical requirements and is compatible with your existing contra-angles and straight handpieces*1 helping you to manage the cost of a mobile dentistry set-up.

* 1 Conformable to ISO 3964.

Use the built-in rechargeable battery or plug into the mains.

Able to operate with rechargeable batteries anywhere. When battery power level is low, just plug in AC adapter into outlet; bring the unit to patient visits without worry. It is very easy to carry since the control unit is palm-size (W 72 x D 180 x H 36 mm) and weighs only 370g.

Foot Control (optional extra)

Conveniently adjust the motor speed by depressing the pedal of the foot control without taking your eyes of the treatment.

Carrying Case

Comes with a carrying case designed for storing VIVAMATE G5 unit and its attachments.
